

# ARMORCOAT XC SYSTEMS

## XPRESS CURE HIGH WEAR & CHEMICAL RESISTANT OVERLAY

# SPEED

Dairy Platform

**ARMORCOAT XC** offers maximum durability, UV and chemical resistance, and speed clocking in around 40 minutes set time at 70°F. An added 'cold-cure' accelerator may also be used in below freezing temperatures for fast overlays in refrigerated areas or during inclement weather.

This VOC compliant technology offers a flowable stand-alone coating with good leveling properties and can also be used to create a number of systems (see reverse) to facilitate the needs of any fast-paced production environment.

Food Processing

Containment

Hog Slats

### Applications

#### Agricultural

- Parlor Decks
- Tank Rooms
- Feeding Surfaces
- Chemical Storage
- Feed & Grain Storage
- Hog Slats
- Feed Troughs
- Floors

#### Food Processing & General

- Milk & Cheese
- Meat Packing
- Slaughter Facilities
- Beverage Production
- Manufacturing
- Containment
- Offices & Break rooms
- Restrooms & Locker Rooms

### Provides

- **Xpress Cure** - Quick return to service in 30-60 minutes
- **Cold Weather Cure** - Apply down to -20°F (-29°C)
- **Superior Wear Protection** - Up to 20 years protection or more
- **Chemical Resistant** - Withstands corrosive production compounds

# ARMORCOAT XC SYSTEMS

## VSC Systems Available with Xpress Cure Technology

### ARMOR-ROCK XC

- **Armor-Rock High-Build** - The most heavy-duty version of Armor-Rock is designed for tough wear in harsh environments. Hardened aggregates are blended and broadcast into the system to develop excellent resistance to chemicals and the impact of animal and machinery traffic. Use to resurface new to minimal wear, or areas repaired prior to application.
- **Armor-Rock THX Smooth** - A lower build version of Armor-Rock XC, the THX Smooth system utilizes a fumed silica to provide uniform surfaces in environments where sanitary, durable stability are required. Optimal for feeding surfaces, pharmaceutical floors, and clean room areas.
- **Armor-Rock THX Non-Slip** - Incorporating THX technology and durability with the added benefit of a broadcast, non-slip surface where required for safety and added life expectancy of the coating. Perfect for areas with high foot traffic.

High-Build

Smooth

Non-Slip

### ARMOR-STONE XC

- **Armor-Stone Overlay** - This trowel applied system integrates a specially processed aggregate combined with the Armorcoat XC formula to create a mortar overlay that can repair and level in one application. At a 1/4" and up, this system adds durability and chemical resistance to any surface. Excellent for containment and areas where drainage requires proper sloping.

Armor-Stone Overlay

### COLOR-STONE XC

- **Color-Stone Decorative** - For durability and beauty the decorative Color-Stone system utilizes hardened aggregate which may be selected in a wide variety of colors to create an assortment of attractive, solid or blended flooring systems. This system is excellent for manufacturing, showrooms, restrooms, breakrooms and anywhere a presentation of image is desired and a quick return to service is vital.

Color-Stone Decorative

### COLOR-FLAKE XC

- **Color-Flake Decorative** - With the properties of Color-Stone this system provides a distinguished look from all other systems. Colored vinyl flakes are broadcast into the system during application in a random pattern, or for full coverage and then top-coated to create a unique and durable flooring system. Available in standard or custom blends. Use wherever an attractive and easy to maintain floor is required.
